DIAMATEC®

Impossibly fine,  
effortlessly strong

Striving to achieve the most thin and precise designs in ceramics, Diamatec® was developed using a unique blend of alumina and chamotte. The result is a new material that allows designers to achieve the near impossible: highly complex and challenging designs with unprecedented strength and durability.

**STRONGER**

Diamatec® technology means every Ipolyss basin can withstand the maximum impact energy a test machine can deliver.

**ENDURING**

Thanks to Diamatec®, Ipolyss stands up to the most demanding conditions, while being only 3.5mm at its thinnest point.

**LIGHTER**

Diamatec® allows us to combine an ultra light design aesthetic with hardwearing durability for demanding environments.
