Ideal Standard is Singular™ The choice is yours.

Singular aims to offer a vast array of solutions from the Ideal Standard catalogue, so you can create your own. From the home to hospitals, we offer bathrooms and washrooms that meet every possible need.

Singular is more than just an idea. To illustrate Singular, we have developed a series of books where both inspiration and solutions come to life to offer endless possibilities and to present real project ideas. From taps to bathroom suites, from design to installation, Singular offers infinite solutions to architects and specifiers thanks to Ideal Standard's highly experienced teams. Our sector books present well-defined solutions with information on styles, dimensions, colour palettes, technical performance, and specific details for each sector. Every one is a guide to rely on. Now, welcome into our educational book.

Inspiring solutions for tomorrow.

This brochure brings together all you need to create a modern school washroom. The first sections take you through a journey of washroom designs and advice for each educational stage, including a section on teacher and staff toilets.

The subsequent sections feature all the solutions you are likely to need by product category and beyond, listing images, codes and technical drawings.

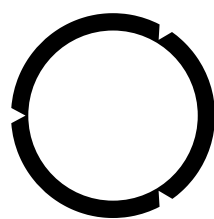

Where it all comes together.

From inspiration to installation, Singular™ is our end-to-end journey for creating endless cross-category washroom and bathroom solutions for all of our customers.

It's built on our understanding of customer and sector needs, and brings together our specification expertise, design and performance to create solutions that make life easier for everyone.

Together for a better future.

Together for Better is not just our brand statement, it is a promise that defines our entire business, touching every aspect of what we do.

As one of the leading manufacturers in the bathroom industry, Ideal Standard has an important role to play when it comes to building a more sustainable future for the benefit of society.

That is why we are taking important steps towards achieving and reporting on our environmental, social and governance goals, constantly pushing ourselves to think differently and implement changes that make a real difference.

2022 Highlights

2MLN

kWh of renewable
energy installed

**Through the installation of
photovoltaic panels at our solar
campus at our Wittlich production
facility in 2022.**

100%

sustainably
certified timber
products

**Through a multisite FFS/PEFC
certification of all Ideal Standard
timber based products.**

4000t

of plastic
waste saved

Through onsite recovery and
recycling systems in our acrylic
sheet facility.

1.2MLN

kg of timber saved
in our baths

Through replacement of all virgin timber
in our bathtubs with Bagasse, a by-
product of the sugar production process.

100%

brass waste
recovery

Through onsite recovery and
recycling systems in our brass
smelting facility.

2500t

CO₂ reduced

Through switching to 100% renewable
electricity in our UK ceramics plant in
2019.

Are your schools washroom compliant?

Our expertise at your service

Ideal Standard and Armitage Shanks have been manufacturing school washroom products for over 100 years, ensuring the very best standards are met for children, no matter the stage of their educational journey.

National regulations for learning facilities are critical factors when designing school washrooms, as well as key requirements such as hygiene, comfort, sustainability and durability.

We provide specifiers with relevant solutions for their projects to ensure they're fully compliant and also a range of services including:

- **Advice on specifications and products**
- **Queries**
- **Specification writing**
- **CAD and BIM Drawings**

Getting the right specification for schools is important. Please contact us if you have any questions or need specification advice.

Designing school washrooms

Your needs

Efficiency of space and flow – design which ensures movement of children through facilities, minimising queuing for WCs, basins and dryers.

Hygiene – reduced splashing in basins, WCs and urinals, and less contact with surfaces, such as taps, doors and worktops.

Comfort factor – a space where children will feel calm, use the facilities fully without rushing or feelings of reluctance.

Washroom – circular, discretion, spacious, inviting, hand washing training, water quality.

Appealing aesthetics – creating a feeling of space in a limited room size to improve the user experience and feelings of wellness.

Sustainability – using less water through more efficient flushing and push or sensor taps, also in combination with low flow aerators.

Simpler, faster cleaning – products whose design allow for cleaning which is effective for hygiene reasons and which is quick, to ensure reduced costs.

Durability – the ability to withstand robust use by young children over time to minimise the need for replacement and repair.

Easy maintenance – considered design which enables quick access for repair and maintenance, for faster interventions and lower cost.

Our technology at your service

Self-closing and touch-free taps: Reduce water waste by delivering water only when needed.

Self-closing taps

Self-closing taps provide easy and intuitive use for younger age groups.

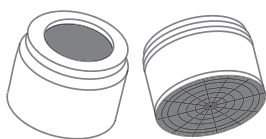

Sensor taps

Sensor taps are touch-free and ensure full hygiene and quick cleaning.

All-in-one taps

Easy to install and easy to clean 2-in-1 solution, giving you both water and soap.

Low flow aerators

Reduce splashing.

Reduce water consumption, still ensuring full comfort of flow.

Rimless toilets

Ensure easy cleaning

and hence more hygiene in crowded, high-use environments like schools.

EasyFix+ installation

The EasyFix system from Ideal Standard makes fitting quicker and easier and is 50% faster than classic installation systems.

Leaders in performance

From comfort and safety to hygiene, durability and sustainability, excellence in performance makes everything possible.

Combining experience and expertise allows us to push past limitations into new possibilities, and deliver innovations that set a new standard in washrooms and bathrooms. It's ingenuity at its best. It's leadership in performance.

FirmaFlow[®]+

Engineered to last.

Ideal Standard pioneered the ceramic mixer tap disc cartridge in 1969, revolutionising the way people use bathrooms forever and making it possible to create the single lever tap.

Some 50 years on, the evolution of this innovation, FirmaFlow[®]+, continues to set the standard for ceramic discs through exceptional engineering and extraordinary durability, offering heat resistance up to 90°C. FirmaFlow[®]+ delivers incredibly smooth operation for 750,000 cycles, ten times the EU norm (EN817) and enough to last a family of four 20 years*.

750.000+

full use cycles, 10x the European norm (EN817)

90°

heat resistant

20 + years

of daily use for a family of four*

*Based on five uses per day per person as well as typical water conditions and use. Test results only apply to our 38mm cartridge.

RimLS+®

**Engineered
for hygiene.**

With every flush, RimLS+® delivers a powerful whole-bowl clean with no place for bacteria to hide. Splash-free and easier to clean, RimLS+™ is the go-to solution for busy bathrooms.

88% of households would buy an Ideal Standard RimLS+ toilet. A toilet with excellent hygiene performance.*

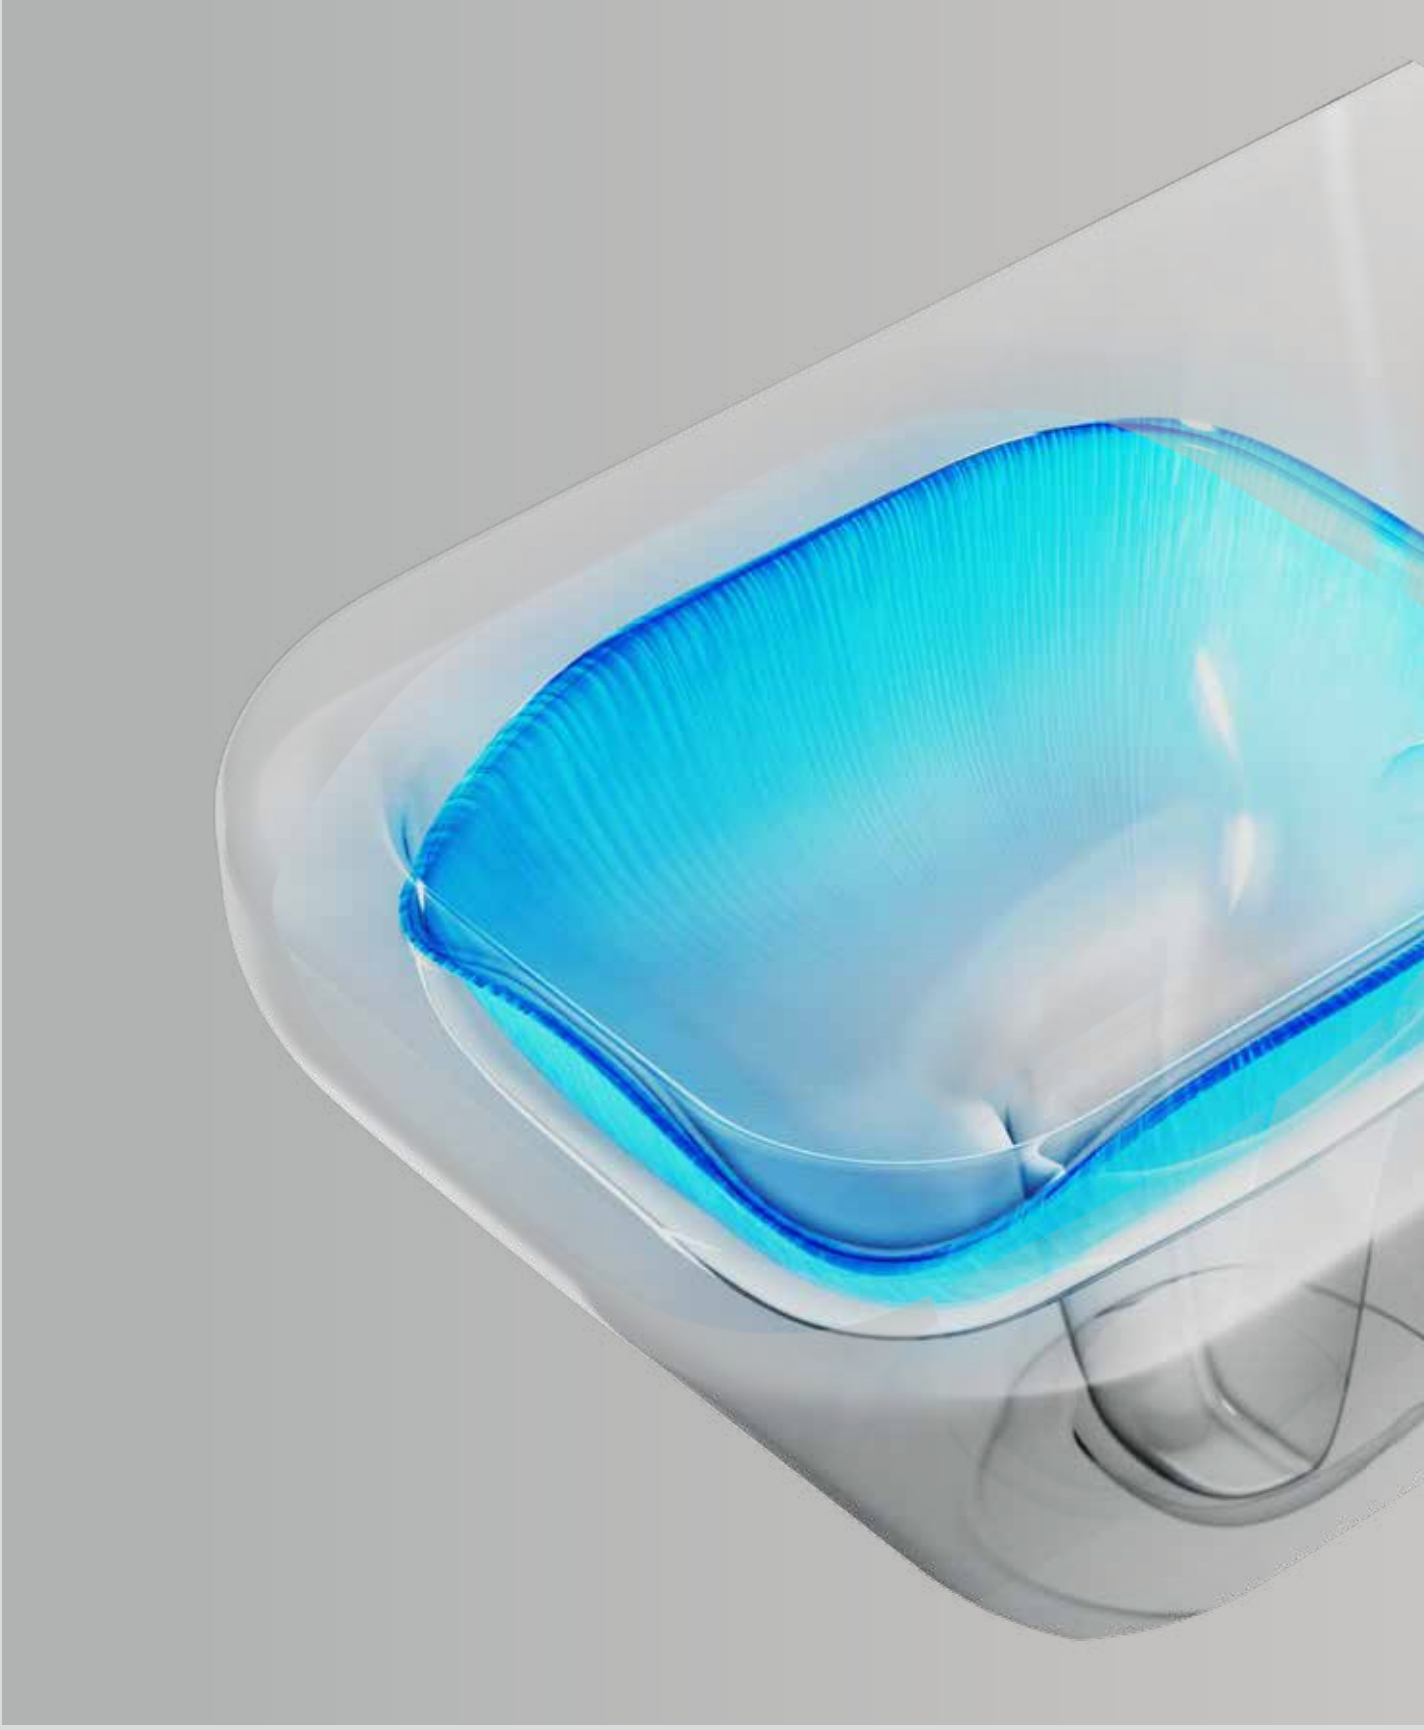

*Result of a user survey commissioned by Ideal Standard and conducted by the institutes TCV-/isi-GmbH [n = 1,000 households with residential property – Germany n=500; Italy n=500], based on the outcome of external test conducted by X-Tech srl for Ideal Standard measuring hygienic parameters of the toilet flush [unwashed toilet area, number of water splashes]. Scientific Supervision of User Survey: Prof. Dr. Andreas Scharf, University of Applied Sciences Nordhausen

ProSys®

Engineered for your peace of mind.

The ProSys® installation system provides complete pre-wall solutions for all washroom fixtures: toilets, washbasins and urinals. With different products for solid and dry wall applications, ProSys® is ideal for a wide variety of projects. This versatile range combines seamlessly with ideal Standard's range of ceramics and fittings to ensure optimal performance. With end- to-end quality control and exceeding testing standards, the ProSys® system provides complete peace of mind.

AquaBlade®

Engineered for hygiene.

Silent, superior, splash-free flushing, even at low water volumes.

For spaces where hygiene is paramount, and for washrooms where first impressions are essential, AquaBlade® is the ultimate design solution.

CLEANER

AquaBlade® technology ensures 95% of the surface is cleaned every time.

QUIETER

AquaBlade® is proven to be up to 25% quieter than equivalent models.

SMARTER

More effective and efficient use of water compared to standard flushes.

Solutions **for pre-school** (3-5 years of age)

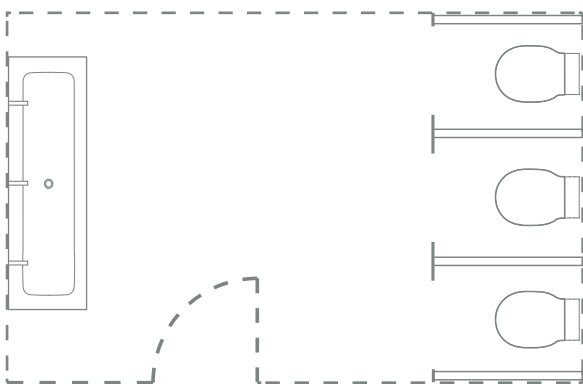

Washrooms that improve confidence.

At this age, children are developing their confidence in going to the bathroom, with many still using a potty at home. Their school washroom needs to make them feel comfortable, happy to use the toilet and wash their hands themselves.

Washrooms that improve confidence.

Sensorflow 21 taps offer superior hygiene and efficiency, while the Broadway wash trough is robust and quick to clean. Washing is made easy for little hands.

Our Splash range has been carefully designed to create an inviting environment, making for an easy transition from home to public washroom and showing a playful side, with colours and sizes appealing to little ones.

Solutions **for primary school** (5-7 years of age)

A big step, made smaller.

When starting primary school, most children are at a stage when they are beginning to visit the toilet alone, possibly for the first time. With its bright colours and fun design, our Splash range enables this transition by making the washroom into an appealing space to visit.

Promoting hand washing, reducing water wastage.

For children of this age, going to the toilet is often a barrier to playing, so it's essential to make the washroom an attractive environment they won't rush to leave without washing their hands thoroughly. At the same time, we recognise the importance of the considered use of resources, which is ensured through taps which automatically turn off after a set number of seconds, avoiding unnecessary water wastage.

Solutions **for junior school** (7-11 years of age)

Simplistic facilities with an air of maturity.

As children enter junior school, they want to feel more grown-up, progressing from facilities tailored to younger ones. The flexibility of the Splash range offers larger basins and WCs while keeping design continuity throughout the washrooms at different stages of school life.

Sophisticated design for older children.

Adding a semi-pedestal to the 50cm basin adds a level of sophistication for the older child while at the same time concealing pipework. This washroom also features the new Splash wall hung pan with rimless technology, designed for easy cleaning also inside the bowl.

Solutions **for secondary school** (11-16 years of age)

Washing spaces that students feel at home in.

As children move towards adulthood, washrooms become more like conventional washing spaces. However, many of the principles of designing a washroom established in earlier years still apply. Bright airy spaces are a must, with contemporary fixtures and fittings that are durable and easy to keep clean.

Minimal aesthetic, outstanding practicality.

The Contour 21 troughs give a feeling of modern minimalism with a streamline shape and a sleek satin finish. Integral upstands ensure hygiene and reduced splashing while fully skirted panels conceal pipework and plumbing, at the same time being readily accessible for servicing.

Solutions for accessible bathroom

Accessible design with the user in mind.

Toilets for disabled pupils, staff or visitors and washrooms should be practical while still retaining elements of elegant design and outstanding engineering. Our Doc M packs have been created to surpass regulations that architects and installers must work to, ensuring a comfortable user experience in an appealing space.

Accessibility with all things considered.

Our products are packed with meaningful technologies aimed at making life easier, safer, better. Here are a few key benefits our products offer.

Visual contrast between sanitaryware, grab rails, alarm cord and walls improve visibility for users.

Toilet seat in contrasting colour.

Extended lever single mixer taps are easier to control for people who may have limited mobility and co-ordination.

Concealed cistern accessible via tamper proof plate to prevent accidental damage.

Smooth surfaces with rounded edges help to prevent the build-up of dirt and germs.

Fittings which adhere to guidance in BS 8300-2:2018+A1:2010 for design of accessible and inclusive environments

Solutions for teachers and staff.

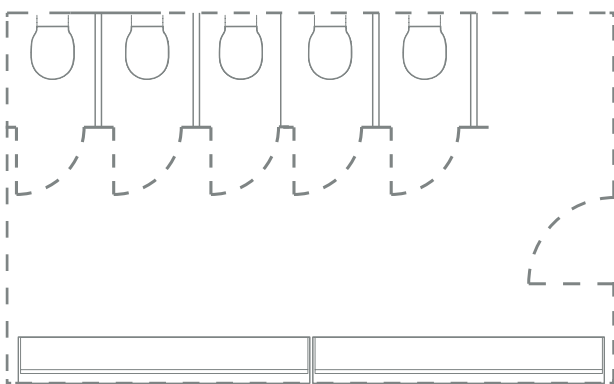

A modern space for the busy professional.

Attractive facilities for teachers and staff are important as the washroom is a sanctuary for professionals during the school day. We offer a wide choice of basins, troughs, WCs and taps which create a smart, contemporary space for busy staff in educational environments..

Superior build quality meets smart design.

Ideal Standard washrooms combine sleek and contemporary aesthetics with superior build quality and smart design that enhance user experience while ensuring durability and making cleaning and maintenance simpler and more economical. The robust white Silhouette trough combines here with Sensorflow 21® infrared sensor taps.

The clean and minimal look is completed by Sphero urinals, which deliver a smarter urinal range that's fit for the modern world.

Solutions for boarding school

Facilities that make an instant impression.

Bathrooms and washrooms in private schools should be comfortable and welcoming, providing reassurance to young people who may be away from home for the first time. They must also convey a feeling of quality to parents with high expectations and a desire to see their children living in superior accommodation.

For a space that's easier, cleaner, calmer.

No room should compromise on aesthetics or experience. Thanks to its modular design, our i.life A and Ceraplan ranges bring beauty to any space. Pure, rounded lines create a space that flows, while clever technology ensures greater hygiene and improved water efficiency.

Solutions for sports centres.

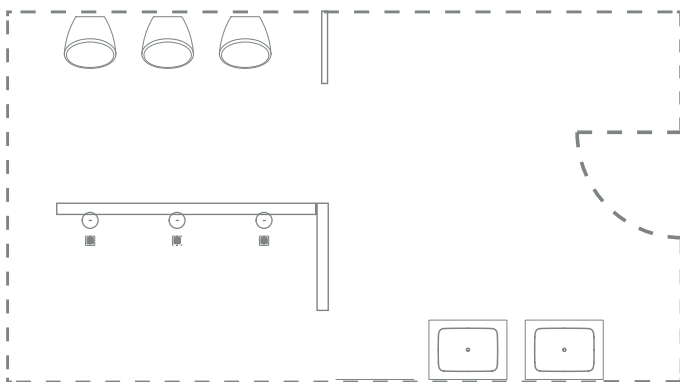

A space for users with high expectations.

High quality washroom facilities are essential to the overall sports centre and gym experience. Users demand clean, contemporary environments before and after physical activity, stepping out of the into clean, hygienic and visually attractive spaces.

Less flow, but flawless.

Singular™ Solutions from Ideal Standard.
The Sensorflow® shower combines elegant and timeless aesthetics with superior build quality and smart design, including low flow rates which meet BREEAM and LEED standards, without detracting from the showering experience. This innovative electronic shower is available in matt silver and silk black finishes.

The clean and minimal look is completed by Sphero® urinals, which deliver a smarter urinal range that's fit for the modern world.

Simple installation outstanding performance.

Water-saving functionality is essential in the modern washroom, where sustainability is as important as aesthetics. These products deliver both, with the super-efficient Sensorflow 21 infrared sensor tap in rim, panel or wall-mounted options and the elegant, Contour 21 under-countertop basin featuring an easy-to-clean yet contemporary design.

The Connect Air toilets feature Ideal Standard's Aquablade technology, providing silent, superior, splash-free flushing, even at low water volumes.

Guarantee

**5 years on taps and mixers,
lifetime on all ceramic products.**

Our confidence in the quality and reliability of our product allows us to offer outstanding extended guarantees on all our products – where the product fails within 5 years/lifetime we offer a free replacement or replacement part (or nearest equivalent). So when your washroom has been satisfactorily installed and is working well, please ensure you register your guarantee.

This guarantee is transferable – it applies to the product not the purchaser provided the guarantee registration is passed on to the new owner.

Liability is limited to individual products and the guarantee does not cover the consequential loss or damage or installation costs. This guarantee does not affect your statutory rights. Products must be installed, used and cared for in line with our fixing instructions and local water regulations, and room must be adequately ventilated.

Parts (eg. flushvalves) are guaranteed for five years and will be replaced if found to be faulty.
